

South 9470' Culp  
 Central Wasatch  
 UT  
 Elevation: 9470 ft  
 Aspect: S  
 Specifics: We skied slope

Dave Kelly  
 02/05/2023 - 1:30pm  
 Co-ord: 40.59639N, -111.62957W  
 Slope Angle: 27°  
 Wind Loading: no

Stability: Fair  
 Air Temperature: -7.7°C  
 Sky Cover: OVC  
 Precipitation: S1  
 Wind: W Moderate

HS:280  
 Layer Notes:  
 260-248cm: Problematic layer  
 248-245cm: frozen water ice

**Notes:** Small soft slab avalanches 4-6" deep running in the new snow on a density change 2" off the ice crust. Easily triggered with skis and on steeper slopes ran naturally during periods of increased PI rates. Impressive 2" an hour snowfall during tour.
