 Absaroka  
 WY  
 Elevation: 9400 ft  
 Aspect:

Sara Bogert  
 02/24/2023 - 12:30pm  
 Co-ord: 44.46277N, -110.13453W  
 Slope Angle: 45°  
 Wind Loading: yes

Stability:  
 Air Temperature:  
 Sky Cover: OVC  
 Precipitation: NO  
 Wind: Moderate

PS: 15  
 Layer Notes:  
 0-5cm: New snow, very dense  
 59-60cm: messy mix FC, MF, DF  
 59-60cm: Problematic layer

Specifics: Recent avalanche activity on similar slopes; Recent avalanche activity on different slopes

Notes: Gusty moderate wind. Recent storm 2/19-22 (27" storm snow, 2"SWE) w/ strong W and E winds. Saw some recent avalanches on different elevations and slope aspects from the storm. ECT24(+6), odd propagation - went about halfway across column with 1 additional tap, then progressively more each tap until it crossed the column on 6th tap. Visually apparent failure layer (see attached photo).
