

Eagle
Tröllaskagi
Iceland
Elevation: 930 m
Aspect: S

Owen Day
03/03/2023 - 14:30
Co-ord: 66.01980N, -18.61024W
Slope Angle: 32°
Wind Loading:

Stability: Very Good
Air Temperature: 1°C
Sky Cover: BKN
Precipitation: NO
Wind: Calm

PF: 0
PS: 0
Layer Notes:
0-2cm: Softened due to solar
27-52cm: Multiple laminated crusts
27-52cm: Problematic layer

Specifics: Ski tracks on slope; We skied slope; Snowmobile tracks on slope

Notes: Test profile - Was shallow due to density of snow and shovels onsite. Garden spades would be more suitable.

The profile wall had variability in depth of the recent snow distribution. The CTH(22) SC down 35cm was a repeatable test result but the depth changed on the second test

HS in this location is +320cm of very dens snow.
