

Coyote Moon
Sierra Nevada
CA

Evan Leonard
03/05/2023 - 2:00pm
Co-ord: 39.32902N, -120.20424W
Slope Angle: 15°
Wind Loading: previous

Stability: Good
Air Temperature: -5.6°C
Sky Cover: OVC
Precipitation: S1
Wind: W Moderate

HS:210
Layer Notes:
0-40cm: Problematic layer

Elevation: 6250 ft
Aspect: 180°
Specifics: We skied slope

Notes: I skied behind my house 300' up to the south facing edge of Coyote Moon Golf Course to see if I could get any results on MFcr from the high pressure system this past week before the most recent round of storms. Over a foot of new snow was seen on the entirety of the very short ski to the top from the neighborhood, with some prior wind loading from early in the storm in the few non-treed areas. The clouds broke and wind picked up while digging my pit, but the snow returned and wind died down as I left my pit location. An excellent dozen turns were made before exiting behind the Safeway shopping plaza.
