

Bobs Knob
 Southern Wasatch
 UT
Elevation: 8440 ft
Aspect: 147°
Specifics:

Mark Staples
 03/07/2023 - 12:00pm
Co-ord: 40.41080N, -111.61394W
Slope Angle: 27°
Wind Loading: no

Stability: Good
Air Temperature: 140-138cm: dirty
Sky Cover: 138-134cm: Problematic layer
Precipitation:
Wind:

Notes: The thick and soft faceted layer under the thick crust really tells the story of how different things are this winter. Normally this location would be baked and riddled with crusts and not have such a layer of facets. With such a thick, strong crust on top of them, I don't think they are a concern
