Bobs Knob Southern Wasatch

UT Elevation: 8440 ft

Aspect: 147° Specifics: Mark Staples 03/07/2023 - 12:00pm

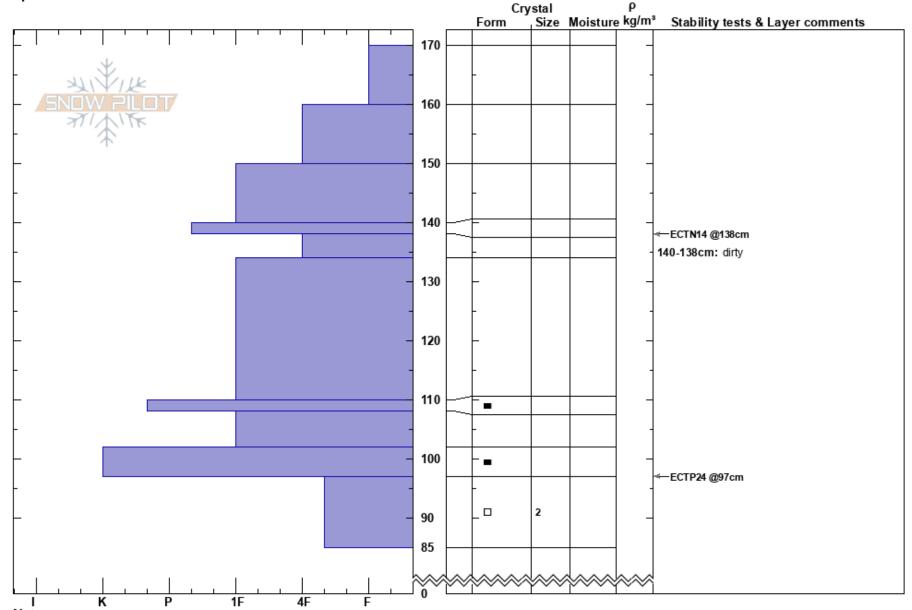

Co-ord: 40.41080N, -111.61394W

Slope Angle: 27° Wind Loading: no Stability: Good Air Temperature: Sky Cover: HS: 170 Layer Notes:

140-138cm: dirty 138-134cm: Problematic layer

Precipitation:

Wind:

**Notes:** The thick and soft faceted layer under the thick crust really tells the story of how different things are this winter. Normally this location would be baked and riddled with crusts and not have such a layer of facets. With such a thick, strong crust on top of them, I don't think they are a concern
