**Co-ord:** 39.44440N, -105.96306W  
**Slope Angle:** 33°  
**Wind Loading:**

**Stability:**  
**Air Temperature:**  
**Sky Cover:** FEW  
**Precipitation:** NO  
**Wind:** Calm

**HS:** 105  
**Layer Notes:**  
 63-58cm: Problematic layer

**Specifics:** Pit is adjacent to avalanche: flank; Recent avalanche activity on similar slopes

**Notes:** I observed this profile in the lower crown/flank of an avalanche. ECT produced a clean break, but the slab broke into several large pieces.
