Co-ord: 39.44440N, -105.96306W
Slope Angle: 33°
Wind Loading:

Stability:
Air Temperature:
Sky Cover: FEW
Precipitation: NO
Wind: Calm

HS: 105
Layer Notes:
 63-58cm: Problematic layer

Specifics: Pit is adjacent to avalanche: flank; Recent avalanche activity on similar slopes

Notes: I observed this profile in the lower crown/flank of an avalanche. ECT produced a clean break, but the slab broke into several large pieces.
