Co-ord: 43.47716N, -110.94954W
Slope Angle: 21°
Wind Loading:

Stability: Poor **HS:** 69 **Layer Notes:**
Air Temperature: 2°C **PF:** 55 26-14cm: Problematic layer
Sky Cover: FEW
Precipitation: NO
Wind: SW Light Breeze

Notes: Widespread collapsing in the area. Remote triggered a D2.5 a couple hundred yards away from this pit location about an hour later on NE slope. Broke in steep rocky terrain at convex rollover. A good amount of moisture in the snowpack including the facets under the new slab. You could almost make a snowball.
