**Stability:** Poor **HS:** 69 **Layer Notes:**  
**Air Temperature:** 2°C **PF:** 55 26-14cm: Problematic layer  
**Sky Cover:** FEW  
**Precipitation:** NO  
**Wind:** SW Light Breeze

**Notes:** Widespread collapsing in the area. Remote triggered a D2.5 a couple hundred yards away from this pit location about an hour later on NE slope. Broke in steep rocky terrain at convex rollover. A good amount of moisture in the snowpack including the facets under the new slab. You could almost make a snowball.
