

Elly 9260' East Aspect

Travis Baldwin

Stability: Poor

HS: 69

Layer Notes:

Teton Range

12/05/2023 - 12:00pm

Air Temperature: 2°C

PF: 55

26-14cm: Problematic layer

WY

Co-ord: 43.47716N, -110.94954W

Sky Cover: FEW

Precipitation: NO

Elevation: 9260 ft

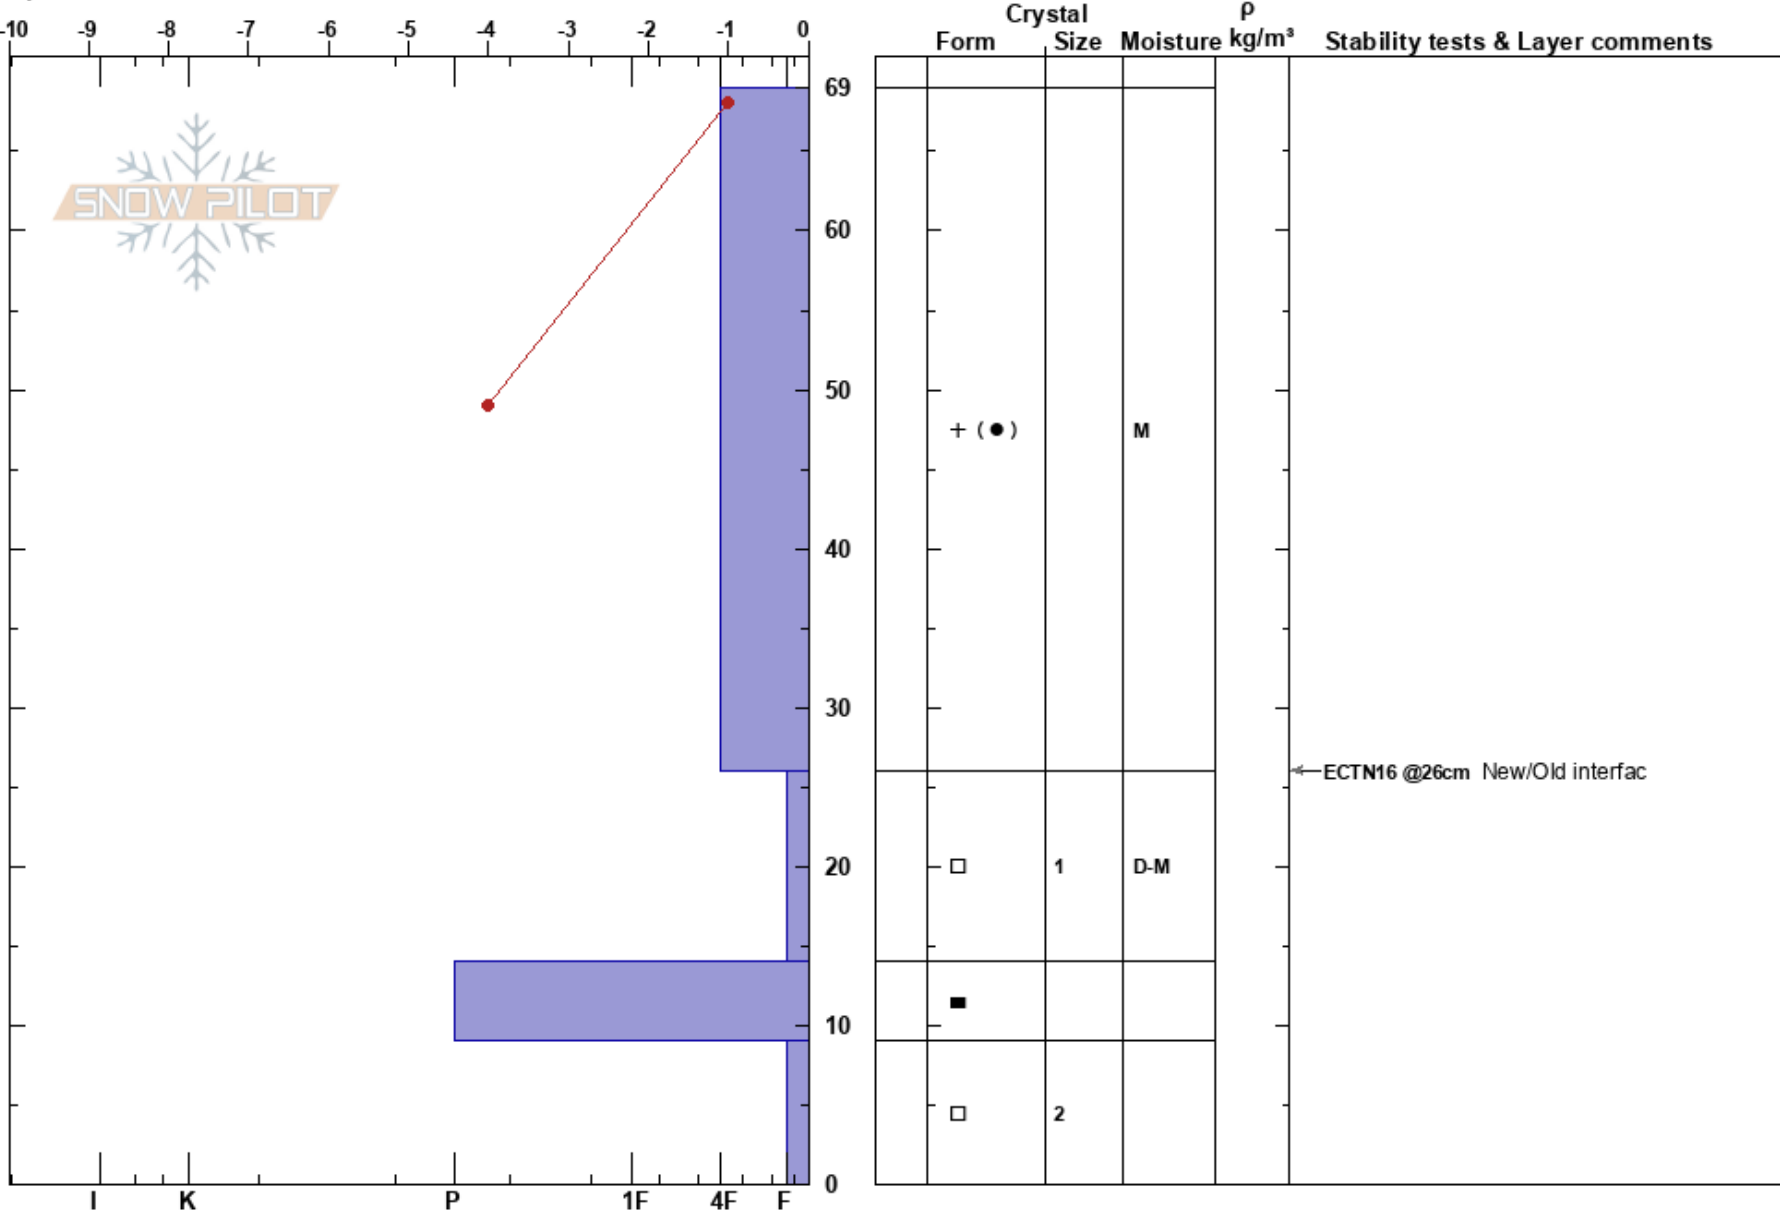

Slope Angle: 21°

Wind: SW Light Breeze

Aspect: E

Wind Loading:

Specifics: Collapsing, widespread; Recent avalanche activity on similar slopes

Notes: Widespread collapsing in the area. Remote triggered a D2.5 a couple hundred yards away from this pit location about an hour later on NE slope. Broke in steep rocky terrain at convex rollover. A good amount of moisture in the snowpack including the facets under the new slab. You could almost make a snowball.
