**Co-ord:** 44.47032N, -110.15944W  
**Slope Angle:** 25°  
**Wind Loading:** no

**Stability:** Poor  
**Air Temperature:** 34°C  
**Sky Cover:** OVC  
**Precipitation:** NO  
**Wind:** SW Calm

**HS:** 96  
**PF:** 60  
**PS:** 15  
**Layer Notes:**  
 72-62cm: Problematic layer  
 37-0cm: November Layer

**Notes:** Noted a widespread propagating layer in the most recent snowfall. Speculate cause as temperature change in storm snow. Minimal cracking and some collapsing observed on up track. No significant natural activity in area, or movement noted on skiofearly season snowpack. (GROM score:2) Poor
