

Low Max's SW Face
Chugach Range
AK

Elevation: 2476 ft
Aspect: SW
Specifics:

Grant Slesser
12/06/2023 - 12:00pm
Co-ord: 60.95208N, -149.09203W
Slope Angle: 24°
Wind Loading: yes

Stability:
Air Temperature: -9°C
Sky Cover: OVC
Precipitation: S-1
Wind: SW Light Breeze

HS: 159
PF: 40
PS: 30
Layer Notes:
111-105cm: Thanksgiving Crust
111-105cm: Problematic layer

Notes: Light winds gusting moderately with visibility to ridge tops. Most previous tracks were smoothed over making for a creamy skiing surface of 30-40 cm of settled powder with some with minor wind stiffening. I witnessed some flagging during gusts and noticed a surface cm wind skin as well as a few isolated rolls on steeper terrain that were loading. The Thanksgiving crust was 48 cm down from the surface with rounding BSH where I dug. The quality of skiing and snow pack stability seemed ideal. Skied from below the steep face due to winds and I was skiing alone.
