 12/12/2023 - 09:50
Co-ord:
Slope Angle: 32°
Wind Loading:

Stability:
Air Temperature:
Sky Cover: FEW
Precipitation: NO
Wind: Calm

HS: 47
PF: 15
PS: 5
Layer Notes:
 0-2cm: rimed surface particles
 26-27cm: Problematic layer
 27-47cm: glacial ice interface FC

Notes: Snowpack interface/bond to glacial ice. Test pit directly below large top of bowl crevasse.
 Compression tests both failing on Fc under crust. HS near top of glacial ice consistently 40-80cm, increasing in depth lower down due to debris.
