Slope Angle: 30°  
Wind Loading: previous

Stability:  
Air Temperature:  
Sky Cover: BKN  
Precipitation: NO  
Wind: Calm

HS: 154  
PF: 5  
PS: 0

Layer Notes:  
64-104cm: Problematic layer

**Notes:** Pit was dug amongst sparse trees on slope adjacent to D2 wet slab avalanche (likely from several days prior). Numerous other avalanches were observed in the area (also assumed to be from several days prior) on E, S, W facing slopes, including a D3, D2+ and several D1 to D2 wet slab avalanches. Surface was supportable crust over heavily runneled base.
