 Slope Angle: 38°  
 Wind Loading: previous

Stability: Good  
 Air Temperature: -1.5°C  
 Sky Cover: CLR  
 Precipitation: NO  
 Wind: Calm

HS: 310  
 PF: 10  
 Layer Notes:  
 272-268cm: TG favors further rounding  
 272-268cm: Problematic layer

**Notes:** Pit was dug about 2 meters downhill of a rocky outcropping.

Layer of greatest concern (depth 272-268 cm) seems to be gaining strength based on temperature profile and overall rounding grain shape with only some grains still showing angular edges.

Strong snowpack overall.
